Dear Sir:

In the interest of seeing that genetically engineered foods be labeled as such, I protest that the labeling should be mandatory, not merely voluntary as proposed by the FDA. I feel that every human being has the right to know exactly what he is consuming, especially in light of the fact that many people of all ages are prone to various allergies which need to be addressed. Our bodies are already under severe attack from sprays and waxes applied to fruits and vegetables. Let us not have more problems added at a time when we are eagerly searching for knowledge to help us to improve our eating habits, thereby adding to the quality of our lives.

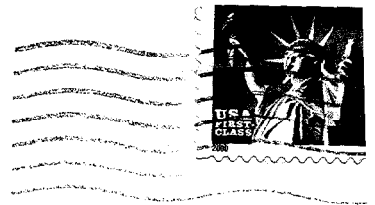

Sincerely yours,

  
Dorothea Jump
